EDUCATION

Nanyang Technological University Jul 2023 - May 2027

- Bachelor's Degree in Computer Science (Distinction Honors), Specialization in Data Science and AI

INTERNSHIP EXPERIENCE

Absolute Kinetics Consultancy Pte.Ltd - Technical Development Jan 2026 - Jul 2026

- Independently developed and deployed a feedback and analytics platform using TypeScript, Python, and MySQL, integrating dynamic forms, analytics dashboards, and low-rating alerts to support training-quality monitoring and service improvement.
- Re-engineered student and invigilator workflows for an online examination platform and integrated head-pose tracking-based proctoring, including threshold configuration, exception handling and production debugging.

Inteagle Vision - Technical Marketing Dec 2025 - Jan 2026

- Conducted Hong Kong market and regulatory analysis and supported rapid prototyping of 3D exhibition models using Blender.

SG Noah's Ark EduTec Pte.Ltd - Software Eng & Product Manager May 2025 - Nov 2025

- Prototyped a Python/Airtable school retrieval and ranking engine by transforming 700+ school records, designing filters and scoring rules, and validating recommendations against 150+ representative student profiles.
- Led requirements clarification, PRD development and UAT for messaging, application tracking and RBAC modules; shortened new-staff onboarding time by about 70% through standardized SOPs.

PROJECT EXPERIENCE

MASSIVE Intent Classification & Slot Filling Aug 2026 - Present

- Developed and trained an attention-based seq2seq model with word embeddings for intent classification and slot filling, keeping total model parameters within 20M.
- Built preprocessing and evaluation pipelines for 16,521 MASSIVE English utterances while preserving official data splits; tracked training metrics, selected the best validation checkpoint, and evaluated intent accuracy and exact-match slot micro-F1 on validation and held-out test sets.

Autonomous Robot Controller & Algorithm Design Aug 2026 - Oct 2026

- Developed an Android robot-control application with map and obstacle configuration, real-time status updates, and Bluetooth command exchange; validated control workflows through physical-device testing and end-to-end robot integration.
- Contributed to path planning using Dijkstra's algorithm to compute shortest paths to obstacle recognition positions, supporting the robot's image-recognition task with the aim of reducing travel overhead and overall completion time.

Course Selection Website for NTU Jan 2025 - Jun 2025

- Developed a React/Flask NTU course-planning platform serving 1,000+ students, featuring real-time vacancy tracking, calendar synchronization, authentication, and Telegram integration.

LEADERSHIP EXPERIENCES

Captain of Snooker Club (NTU Hall of Residence 3)

- Led Hall 3 Snooker Team to win the NTU Inter-Hall Games Championship

SKILLS

- Computer: Python, Android, GitHub, Blender, Claude Code, PyTorch
